

BUILD. HOST. SECURE.

The Trifecta of Modern Software

Free estimates and prototypes

We build, host, and secure your applications under one roof.
Visa · MasterCard · American Express · Authorize.net · Stripe
Integrations with all providers available.

Effective Solutions, LLC — "Full control without the complexity."

What You Get

Development

Any custom application:

- E-commerce with custom checkout
- Timekeeping and payroll integration
- Inventory management
- Lead and sales conversion systems
- Click tracking and analytics
- Proprietary business processes

All built from scratch by our team – no black boxes, no third-party bloat.

Hosting + Security

Managed together, guaranteed:

- Secure, scalable cloud infrastructure
- Automatic backups and disaster recovery
- 24/7 monitoring and uptime SLA
- PCI-DSS compliance
- Real-time threat detection

AWS preferred — Virtual private servers.
Dedicated available — Kansas City and St. Louis datacenters available.

Why the Trifecta Works

Single-source accountability. One team, one contract, one point of contact.

No finger-pointing. When you own the stack, you own the results.

Flexible engagement. Use us for just development, just hosting, or the full package.

Payment-first architecture. Your gateway of choice, integrated from day one.

Partner referrals earn fees. Introduce a client — we build and host. You earn commission.
